## Education

**University of Wisconsin–Madison** — Madison, WI
*B.S. in Computer Science & Data Science, Certificate in Entrepreneurship & Business | GPA: 3.84, Dean's List* — *May 2026*

## Experience

**Forward Deployed Engineer (Contract)** — Sep. 2026 – Present
*nesen.ai, Agentic Supply Chain Coordination Platform* — *San Francisco, CA*

- Architected the path to take a supplier follow-up agent from human-in-the-loop drafting to fully autonomous, rule-driven email sends, and presented the design and a working demo to the CEO
- Audited the integration layer syncing ERP (NetSuite via Nango) and Outlook data for a manufacturing design partner, and found that rule edits in the UI never reached the agent's prompt configuration

**Market Research and Strategy Consultant** — Jan. 2026 – May 2026
*Builty (builtydata.com)* — *San Francisco, CA (Remote)*

- Ran **10+** customer discovery interviews and a **250**-company segmentation analysis to map buyer pain points and prioritize B2B sales targets for a building permit data startup
- Built a **100+** company partner and channel strategy matrix across **20** categories to identify distribution channels into **570+** insurance carrier clients

**Peer Mentor, CS 620 Computer Sciences Capstone** — Aug. 2025 – May 2026
*University of Wisconsin–Madison* — *Madison, WI*

- Mentored **150+** students across **16–20** industry-sponsored teams from sprint planning to production deployment, debugging code and architecture issues in office hours
- Served as liaison between student teams and industry partners, translating partner requirements into scope and keeping projects on track

**Full Stack Developer** — Jan. 2025 – May 2025
*Amazon (Shopbop) Capstone Project* — *Madison, WI*

- Led a team of **5** to engineer a swipe-based outfit-matching app end-to-end, building a recommendation engine in Python on AWS (DynamoDB, EC2) that cut browsing time for test users by **40%**
- Built authentication, session handling, and dynamic outfit assembly with React.js, Flask, AWS Cognito, and DynamoDB

**Software Engineering Intern** — May 2024 – Aug. 2024
*Beyond Key* — *Chicago, IL*

- Built and evaluated K-means, KNN, SVM, and random forest models on large real-world datasets with scikit-learn, and shipped an accounts receivable Power App using Azure Cognitive Services (Vision)

**Software Engineering Intern** — May 2023 – Aug. 2023
*InfoBeans* — *India (Remote)*

- Built a UiPath RPA bot that reconciled payroll data for **1,200+** employees against HR records, achieving a **100%** automated salary audit

## Projects

**Agentic Tool Router** | *TypeScript, Python, Bun, Claude API, Vercel AI SDK, React, OAuth*

- Built a general-purpose AI agent that discovers and chains tools at runtime from a catalog of **1,300+**, executing real actions across Gmail, Calendar, Drive, Sheets, and GitHub with no hardcoded integrations
- Engineered a server-side bulk pipeline with batched, **5**-way concurrent LLM extraction that turned **633** GitHub issues and a folder of resume PDFs into Google Sheets in **∼20s**
- Designed the toolkit system so adding an integration (Slack, Linear) is a one-line config change; shipped with per-user OAuth and a live view of agent reasoning and tool calls

**Market Pulse** | *Python, Flask, Claude API, Claude Vision, Claude Code, Chart.js*

- Built an AI financial terminal fusing **6** live data sources into a single Bayesian probability score across **147** symbols, with Claude Vision parsing chart screenshots into BUY/SELL calls with stop-loss targets

## Technical Skills

**AI & Agents**: Claude API, OpenAI API, LangChain, LangGraph, MCP, RAG, prompt engineering, pgvector, Claude Code
**Languages**: Python, TypeScript, JavaScript, SQL, Java, Go, Bash
**Integrations & Backend**: REST APIs, webhooks, OAuth, Composio, Nango, Node.js, Flask, FastAPI, React.js
**Data & Infra**: PostgreSQL, MySQL, DynamoDB, BigQuery, Kafka, Docker, AWS, Google Cloud, Git
**Leadership**: VP, Badger Product Management Club (2023 – 2025); Investment Research Analyst, Finance & Investment Society
